

Install Pulse Secure: <https://play.google.com/store/apps/details?id=net.pulsesecure.pulsesecure>

On first launch, the application will ask for the VPN URL. Enter **vpn.coeit.osu.edu**

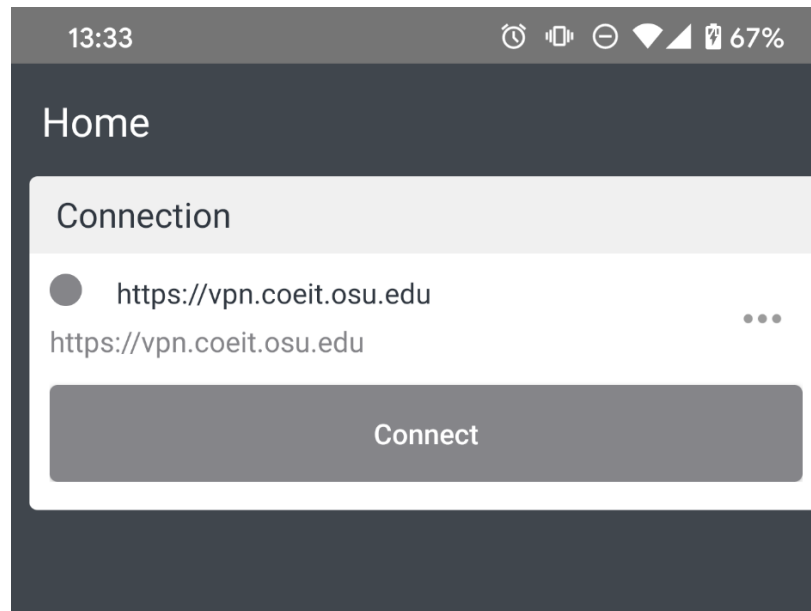

After clicking Submit, the application will bring up this view. It will allow for saving a username so it doesn't need entered every time.

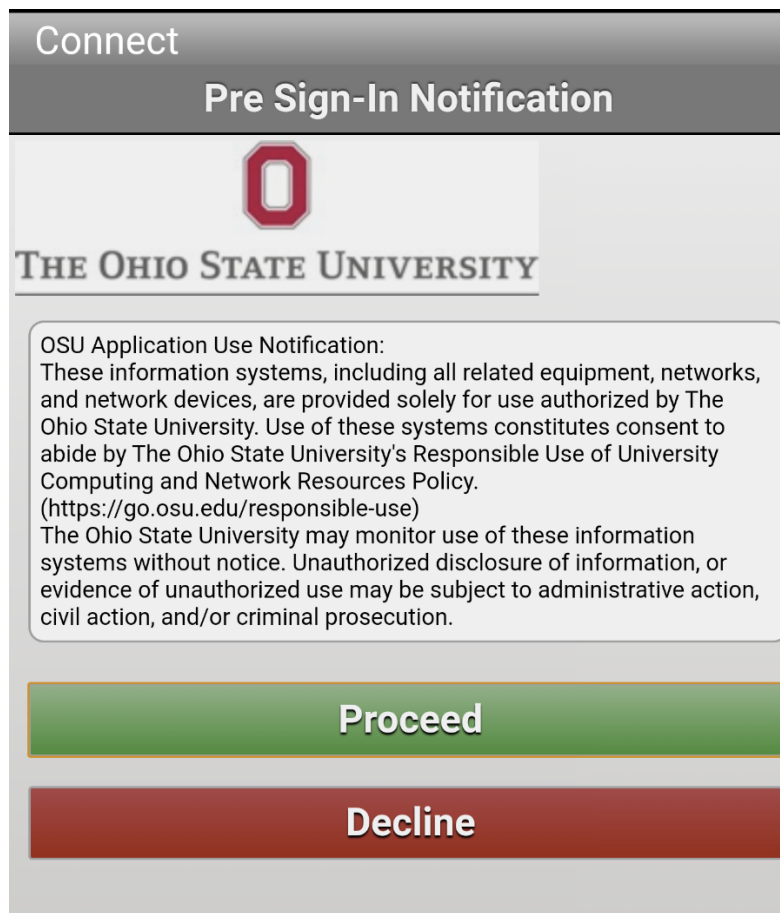

Click **Save** to continue

To initiate a connection, click **Connect**

The first page is the responsible use EULA. Click **Proceed** to continue

This will bring up a sign-in page. If a username was provided in the connection settings earlier, it will be filled in here. Enter a password and click **Sign In**

The screenshot shows a mobile application interface for Pulse Connect Secure. At the top, there is a dark grey header with the word "Connect" on the left and "Login" in the center. Below the header is the Ohio State University logo (a red "O" with a white outline) and the text "THE OHIO STATE UNIVERSITY". Underneath, it says "Welcome to the Pulse Connect Secure". There are three input fields: "username" with the placeholder text "username", "password" with the placeholder text "password", and "Realm" with a dropdown menu currently showing "CoE-Net". A large green button labeled "Sign In" is positioned below the input fields. At the bottom, there is a small line of text: "Please sign in to begin your secure session."

A BuckeyePass page will appear

The screenshot shows the BuckeyePass mobile application interface. It features a dark grey header with "Connect" on the left and "Login" in the center. Below the header is the Ohio State University logo and the text "THE OHIO STATE UNIVERSITY". The main content area is titled "Welcome to the Pulse Connect Secure". A central panel contains a small Ohio State logo, a "Settings" button (represented by a hamburger menu icon), and three large green buttons labeled "Send Me a Push", "Call Me", and "Enter a Passcode". At the bottom of this panel, there is a checkbox labeled "Remember me for 1 day". A blue banner at the very bottom of the screen displays the message "Pushed a login request to your device..." with a "Cancel" button.

After authenticating the second factor, the VPN connection will be established
