Software Center

Software Center is an application, accessible via the Windows Start Menu, on CoE managed Windows devices that helps deliver Applications, Updates, and Operating System Upgrades.

Finding Software Center

Software Center is found under Microsoft System Center by going to the Start Menu > All Programs. Alternatively, you may be able to search for it by clicking the Start button and typing Software Center.

Notifications

Pop up notifications will be displayed when Applications, Updates, or Operating System Upgrades are deployed. Clicking on these notifications will open the Software Center.

When Applications, Update, or Operating System upgrade finishes installing, you will receive pop up notification if a restart is required.

Restart Behavior
Once an installation is finished, if it requires an update, a 24 hour timer is started. At the end of this 24 hours, your computer will restart automatically.
